

AUTO CHARGE[®] 11

STANDARD DUAL SYSTEM BATTERY CHARGER

MODEL # 091-11-12

The Auto Charge 11 is a fully automatic battery charger for vehicles with dual battery systems. This new and improved unit contains two completely independent chargers to sense and control the current to the batteries. Thus parasitic loads on one battery have no effect on the second battery. Total output current is limited to protect the charger but may be supplied to either battery if the adjacent battery does not require it. Normally the current output is proportioned between the two batteries as required.
