MINI BATTERY VOLTAGE DISPLAY

MODEL: 091-250-12

The Mini Battery Display is a universal indicator that displays the vehicles battery voltage. The indicator displays a 3-digit numerical value of the vehicles battery voltage. The display is accurate to 100-millivolts and has a current draw of only 40-milliamps. Installation is simple since the display is designed into standard switch panel housing. A 1.45" x 0.83" panel cut-out is all that's required. Wiring is also simple. Typically wired into a single battery system; connect red to battery positive and black to battery negative. Kussmaul 3-year warranty applies.
